Systems & Networks Administrator

Full stack web developer & designer

CAREER SUMMARY

With over 20 years of experience in IT globally, I began to be interested in computing from the age of 7 years with my first machine the MSX with which I was experimenting the programming language basic.

Later, with the appearance of Windows 95, I was interested in the resolution of bug and the creation of web pages.

Then I started my professional career at Newplast International as a 3D graphic designer because I also like to draw. Later I created my first professional website for Westland Brokerage Company and made my first step in administration and resolution of incidents with Windows NT.

After relocating to Paris, I improved my talents to solve the computer problems of customers through the help desk, on-site technician and server maintenance at Cap Gemini.

Cap Gemini also financed my studies of MCSE 2000 which enabled me to gain executive status at Jobpartners as a Systems and Network Administrator.

Then I tried the adventure as a freelancer, made new experiences in Switzerland from help desk to IT manager.

Back to Paris, I continue to evolve in the systems and networks administration increasingly complex with the new technologies of virtualization such as VMware ESX. This has naturally brought me within Electrogeloz to Citrix apprenticeship and other techniques.

My experience in Alston was very interesting in terms of its scope and the means at its disposal, which enabled me to complete the tasks well before the deadline.

Within the IT department of BNP Paribas Bank, I was able to improve my knowledge in the field of computer security and the improvement of continuity plans.

I always wanted to live in Japan, so I started to undertake a trendy bar project from Paris, unfortunately the project was not successful due to lack of financial means.

To get a start in Japan, I started a freelance assignment at Algonis, which allowed to save enough money to move to Japan in good conditions.

In 2015 i reside in Tagajo at Miyagi prefecture and I begin to undertake the realization of a video game and create web sites in remote work for international clients.

Then in 2016 i move to Tokyo to settle permanently and make a new career.

Technical Knowledge

Hardware :	Maintenance of all types of PC (laptop, desktop, thin client "Wyse, Terminals Eizo", servers, NAS, SAN)
INFRA COM :	Deployment and park management Network Settings, Audit, Security Mixing computer and phone Secure Wifi Network
Operating Systems :	Windows 10/7/VISTA/XP/2012/2008/2003/2000/9x, DOS, MSX2+, Novell, Citrix, VMware, vSphere
Administration :	Installation and management of ACTIVE DIRECTORY (2012R2/2008R2/2003R2/2000/NT4) Deployment and management of Exchange 2003, Outlook 2010, Lotus Notes Client, Installation and management of backup solutions, Arcserve R12.5, Veeam Backup and Replication v5 Installation and management of secures solutions like antivirus, firewalls, etc...
